

Moor Pool Summer Minibeast Trail

Summer is here and Moor Pool has become a haven for minibeasts!

Follow the map on the back and see if you can find our nine crochet bug friends around Moor Pool Estate. Solve the clues, fill in the blanks and then unscramble the letters in boxes to spell out a hidden word.

Lucy the is a spotty type of beetle who loves eating aphids. She can often be found on her favourite rose bush!

Bruno is a and he tastes his food with his feet! He uses a long, straw-like tongue called a proboscis to sip nectar from flowers and rotting fruit.

Susie the can spin silk to create webs, catch prey and protect her eggs. She's great for the environment because she eats pests like flies and mosquitoes.

Wilbur the is very helpful to our gardeners. He creates tunnels in the soil, which allow air and water to reach plant roots, helping them to grow strong and healthy.

Bella the talks to her friends through waggly dancing, letting them know where to find the best flowers with the tastiest nectar and pollen!

Steve the carries his home on his back! His shell protects him from predators, like birds, rodents and insects.

Bertie the plays a vital role in our ecosystems. He helps with pollination, decomposition and controlling pest populations.

Delilah the can be found down by the Pool and is an excellent flyer. She can hover in mid-air, dart quickly and even fly backwards!

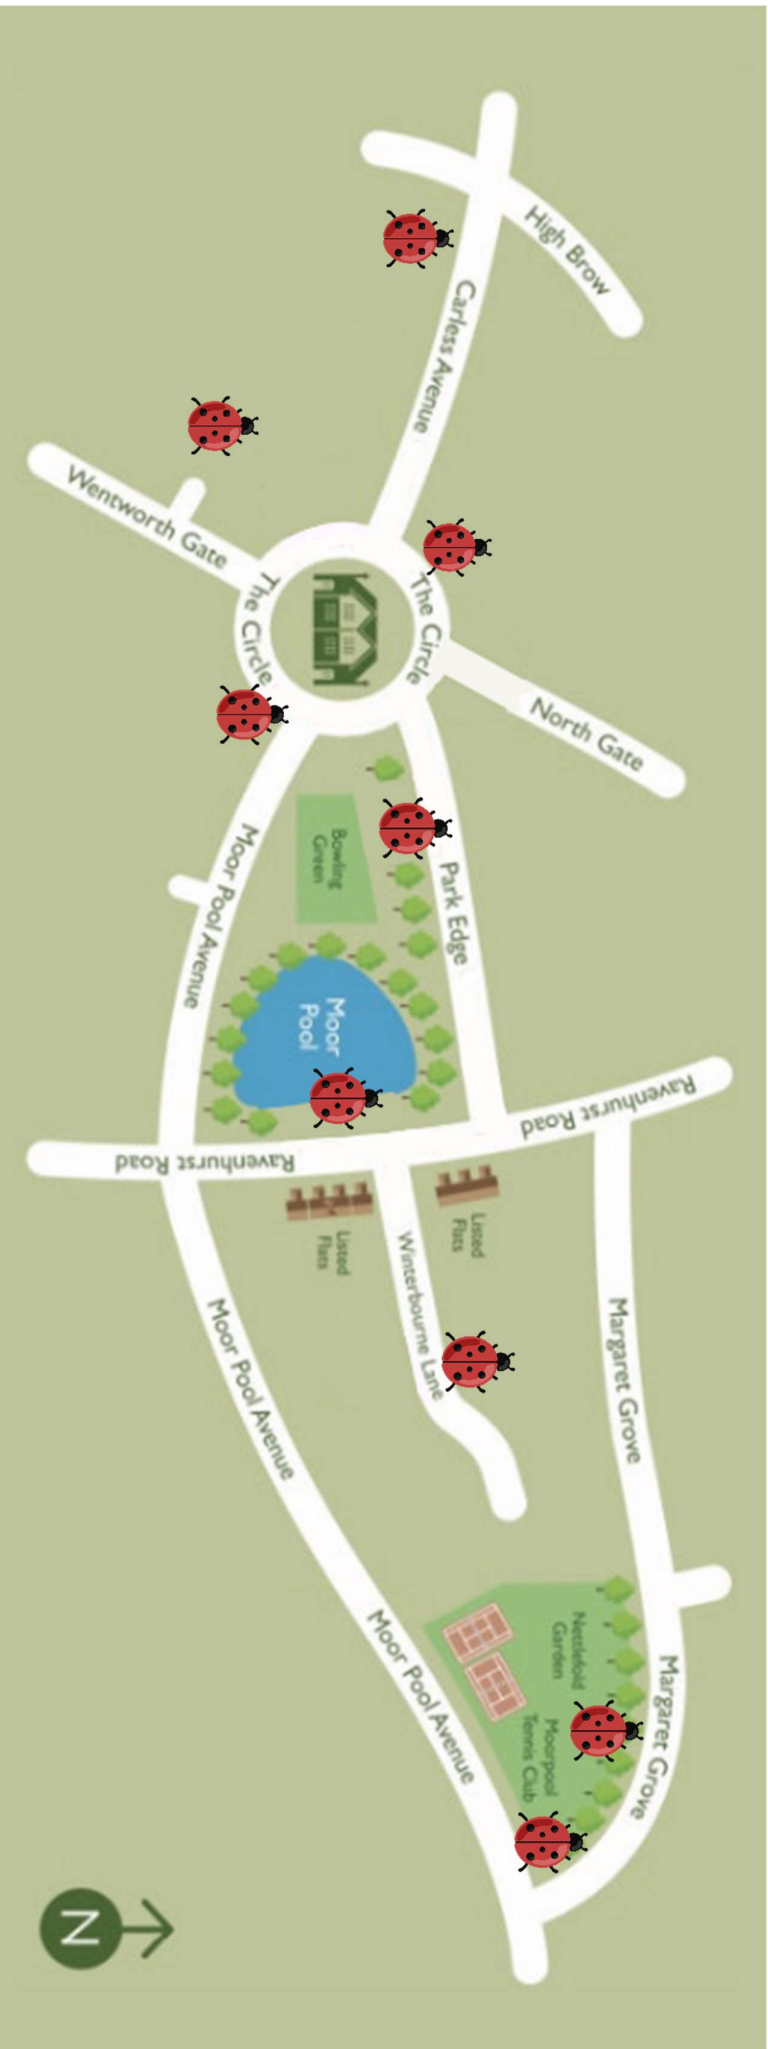

Colin the can be found on a tasty leaf. He has around 4,000 muscles in his body, helping him to move quickly as he crawls and munches.

Hidden word:

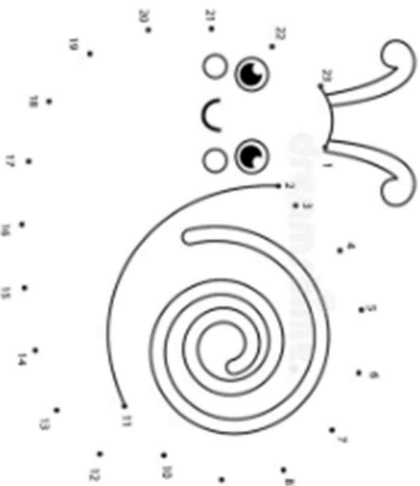

**We would love to see photos of you enjoying the trail!
Tag us at @moorpoolht on Instagram or Facebook**

Once you have finished your trail why not explore some of the green spaces around Moor Pool and look out for some real minibeasts!
